Swing R3 Duo/Tube/Wet

Dear colleague,

The Swing Feeder R3 family grows, we have three models now: Swing R3 Duo (wet & dry with swing mechanism), Swing R3 Wet (wet with swing mechanism) and Swing R3 tube (dry with a tube mechanism feed outlet). These 3 options are in order to meet any farmer request for weaning, fattening and Wean to finish.

ADVANTAGES:

- Monoblock construction makes it very robust and easy to assemble.
- Asymmetric hopper walls and wider hopper outlet makes feed meal flow easier.
- 24 settings of regulation make it more sensible and efficient.
- Easy access and ergonomic hand filling inlet.
- Thanks to the interlocking design of the components the hopper is humidity proof and flavour saving.
- Reliable complete stainless steel water piping.
- Raised pan with complete footing and stabilizer kit included.
- No sharp edges nor gaps, no feed rests and easy to clean.
- 3 different options to fit any specific needs.
- **DUO.** 2 levels bowl to separate feed and water. Unidirectional swinging of mechanism allows easy learning of small piglets avoiding head traps.
- **WET.** 1 level bowl to mix feed and water. Unidirectional mechanism swinging allows easy learning of small piglets with no head traps.
- **TUBE.** External wide tube allows the meal to flow well and piglets to move the mechanism very easily. 2 levels bowl to separate feed and water.

TECHNICAL DATA:

- Nº animals for feeder 30-50
- Animal live weight, 6-120 kg
- Hopper's capacity, 95 L.
- Hopper's filling height, 125 cm
- Diameter of hopper (maximum), 57 cm
- Diameter of hopper (minimum), 14 cm
- Bowl measures: 55 x 45 x 10+3 cm
