**The LONGARM is a smart management tool as it utilizes minimum effort for maximum value.**

## THE SMART TOOL FOR HANDLING HOGS

- stressless management of hogs therefore less stress for barn managers
- saves up to 70 % of the time required to move pigs from one area to another
- requires only one person to operate [eliminates the need for a second person to move pigs around in the barn]
- lightweight, portable, approximately 30 pounds - making the LONGARM a perfect tool for any handler
- the ability to retract allows the opportunity to move a whole group of hogs or remove a single hog by wrapping the curtain around the hog. The steady tension on the fabric will motivate the hog to move in the direction of the gate where the LONGARM is attached.
- meets CQA [Canadian Quality Assurance] standards as the gate can be washed with a pressure washer
- leave the shock prod and chase sticks in the tool room since the LONGARM requires no other accessories
- LONGARM adapts to existing stabling
- LONGARM can sweep areas clean of hogs up to a 50' linear foot swath

- Patent Pending

The chart below was an exercise to demonstrate how much time was saved using the LONGARM.

All time calculated is in seconds:

Tester	Chasing	Longarm	Time Saved
A*	135 sec	50 sec	85 sec
B	60 sec	25 sec	35 sec
C	138 sec	30 sec	108 sec
D	130 sec	23 sec	107 sec
E	117 sec	33 sec	84 sec

\* Tester A had never worked with hogs prior to test.
