- **New Color Touch Screen!**
- **New Linkage!**

**Smart Sort technology providing you with the most accurate, dependable, sorting system on the market.**

## **Design, Creation & Innovation of Hog Management Systems**

Providing a complete line of Scale needs from Sorting Technology to bin & platform scales.

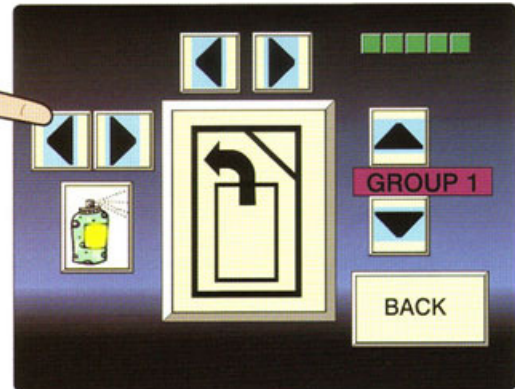

**Where Smart Technology Meets Agriculture**

## Introducing the first & only Color Touch Screen automated sorting scale on the market today.

A large, bright, colorful touch screen offering the ultimate ease in collecting data and controlling your Sorter. Symbols and pictures lead the user simply and clearly through setup and use. The proper buttons appear on the screen only when necessary, making the operation straight forward.

State of the art electronics, backed by advanced software, proven in any situation requiring precision weighing.

Years of data may be stored in the system and on a USB memory stick. Data may subsequently be downloaded into a PC. Twelve outputs can control gates and feed systems. Up to four additional inputs may include barn temp, water usage, RFID tag reader, and others.

Our Windows based software keeps track of daily gains, feed conversion, shipping reports, and more.

Our trained personnel will assist you to set up your barn for optimum results. We will supply drawings and all the support needed to make your barn 100% successful, fully automated system.
